Olsson is a nationally recognized engineering firm made up of people who craft expert solutions and designs that improve communities. The firm offers design and consulting services in planning and design, engineering, field services, environmental, and technology.

- We opened for business in 1956 as John E. Olsson Professional Engineering.
- Olsson has more than 1,200 employees.
- We have about 30 offices in eight states, but we work on projects throughout the United States.
- More than 100 of our employees started with Olsson as students/interns.
- In 2018, we cracked the top 100 of the Engineering News-Record's Top 500 Design Firms list, checking in at 98th. We have been ranked on the list every year dating back to 1996.
- Brad Strittmatter was named president of Olsson in 2009. He was elevated to CEO in 2016.
- In 2014, Olsson moved into its new headquarters located in the West Haymarket in Lincoln, Nebraska. In 2018, Olsson announced plans to build a second office building adjacent to its headquarters. The second office is scheduled to open in 2020.
- We work in the following markets: government, transportation, water, energy, land & facilities, and telecommunications.

A FEW OF OLSSON’S MAJOR PROJECTS INCLUDE:
- Antelope Valley Revitalization in Lincoln, Nebraska
- Batesville Wastewater Treatment System in Batesville, Arkansas
- Gateway Arch National Park Soil Restoration in St. Louis, Missouri
- Kansas State University Chilled Water Expansion in Manhattan, Kansas
- Mercy Hospital in Joplin, Missouri
- Mission Critical work for data centers, multiple locations throughout the U.S.
- West Haymarket Infrastructure in Lincoln, Nebraska

NOTE
We legally changed our name from Olsson Associates to Olsson in 2018. Please use Olsson as our name in all instances.
